

INTERNATIONAL VEIN WEEK

The South African Lymphatic & Venous Society (SALVS) in collaboration with the venous-lymphatic World International Network (v-WIN)

SALVS

SOUTH AFRICAN LYMPHATIC & VENOUS SOCIETY International Vein Week 2024

Education to Health Care Professionals

Lymphatic & venous diseases affect the South African population at large. This includes Lymphoedema, Spider Veins, Varicose Veins, Venous Leg Ulcers among many other.

Recognise limb swelling as a potential sign of CVI or Lymphedema. Early diagnosis improves patient outcomes. Treatment options include compression therapy. Learn more about managing limb swelling!

SALVS offers a virtual library of free patient care information on lymphatic and venous diseases.

DID YOU KNOW?

Limb swelling is a potential sign of Chronic Venous Insufficiency or Lymphedema.

Don't overlook it!

Explore compression therapy as a treatment option to ease patient discomfort.
